

Scooby Doo | Airfield and Gold City Mine Signs

Installation Guide

First, thank you for buying our mod. It is cool to know that we are able to help people keep their machines looking great!

Information:

The mod you have ordered is a sculpted, 3D printed, and hand painted replacement for the flat plastic and metal signs on the upper playfield. These are a direct, no-modification installation.

Tools you'll need include: 5/16" nut driver, #2 Philips screwdriver.

Installation:

Step 1:

Using the nut driver, remove the plastic that the signs are attached to by removing the three nuts shown in red circles. You can leave the colored plastic protector layer.

Step 2:

Using the screwdriver and the nut driver, detach the metal Airfield sign. Using the nylon nut that you just removed, insert it into the hole in the back of the new Airfield signpost. Be sure to insert the nut with the flat side down. Reattach the new Airfield sign by screwing the original screw into the bottom of the Airfield sign, through the plastic. Your grip on the sign post should be more than enough to get the nylon nut to stay still and thread back on.

Step 3:

Using the screwdriver, remove the two screws that hold the Gold City Mine sign to the rock formation. Use the same screws to install the new sign.

Step 4:

Reattach the plastic to the playfield using the original nuts removed in Step 1.
