Scooby Doo | Spider Gate

Installation Guide

First, thank you for buying our mod. It is cool to know that we are able to help people keep their machines looking great!

Information:

The mod you have ordered is a sculpted, 3D printed, and hand painted replacement for the flat plastic gate in the wall section of the upper playfield. This is a direct, no-modification installation.

Tools you'll need include: #1 Philips screwdriver, #2 Philips screwdriver.

Installation:

Step 1:

Using the #2 Philips screwdriver, remove the two screws holding the wall to the upper playfield, as shown in the red circles. The entire front portion of the wall will now easily pull away from the upper playfield.

Step 2:

Flip the wall over. Using the #1 Philips screwdriver, remove the two screws holding the gate against the wall. Swap in the new gate and replace the screws.

Step 3:

Reattach the wall to the upper playfield using the original screws.

Contact:

If anything goes wrong feel free to reach out to support@ninjacamp.com or @aniraf on Pinside. I will respond as quickly as possible.
